

TITLE365

**FOR IMMEDIATE RELEASE**

## **Title365 Company and X1 Labs Achieve SSAE 16 SOC 2 Type II Audit Certification**

**Companies receive gold standard assurance that their data center is secure, highly available and operating under a consistent set of high integrity processes**

**NEWPORT BEACH, Calif. — December 17, 2013** — Title365 Company, a leading nationwide provider of title insurance and escrow services, and its sister organization, X1 Labs, an innovative supplier of advanced technology solutions to the title insurance, settlement services, financial and real estate industries, jointly announced today that both Companies have successfully completed a Statement on Standards for Attestation Engagement No. 16 (SSAE 16) SOC 2 Type II audit. The certification is an internationally recognized auditing standard developed by the American Institute of Certified Public Accountants to examine the controls and processes involved in storing, handling, and transmitting data securely.

A SOC 2 Type II examination in compliance with Trust Service Principles Section 100 (TSP 100) demonstrates that an independent accounting and auditing firm has reviewed and examined an organization's control objectives and activities, and tested those controls to ensure that they are operating effectively. The Type II audit of both Title365 Company and X1 Labs, performed by independent, licensed Certified Public Accounting firm, KSJG, included a detailed review of the availability, integrity, confidentiality, design and operating effectiveness of controls related to network connectivity, firewall configuration, computer operations, database access, data transmissions, backup, software development, and other supporting areas. The examination reviewed the period from July 1, 2013 through November 30, 2013.

"We're committed to service excellence by operating our Internet Data Centers and Cloud Infrastructure at a level that meets or exceeds the highest industry and regulatory standards," said Ryan Jaeger, vice president, systems engineering for Title365 Company. "This certification is a great accomplishment that underscores our dedication to not only provide customers with superior

confidence in our operations, but also negates any compliance concerns as part of our ongoing commitment to secure, reliable solutions.”

"With our successful completion of this voluntary certification, we are able to illustrate our dedication to having stringent controls in place for the protection and security of our clients' confidential information," said Clay White, Chief Compliance Officer (CCO) for Title365. "Customers can count on us to comply with industry best practices across our service portfolio of companies, and our hope is that our efforts allow them to concentrate on growing their business, instead of worrying about compliance."

### **X1 Labs**

X1 Labs, a subsidiary of Experience 1, Inc., offers innovative technology, executive-level strategic consulting, and creative solutions to the title insurance, settlement services, financial and real estate industries. The Company provides integrated, online software and technology services for platform implementation and customization built around the latest security standards. X1 Labs sets the industry standard for flexible, cost-effective solutions and enterprise level infrastructure that only the cloud can provide. As such, technology is a critical part of the service commitment and the infrastructure has been designed with multiple controls to keep systems secure and available 24/7.
